

SDU JOURNAL OF ENGLISH STUDIES

An International Research Journal

A Suleyman Demirel University

CALL FOR PAPERS

Suleyman Demirel University is pleased to announce that we are currently accepting articles for the first issue of “SDU Journal of English Studies” – an official journal of our university.

“SDU Journal of English Studies” is an international open access peer-reviewed journal that welcomes submissions from across the world. Authors are encouraged to submit articles and research/discussion notes on topics relevant to the academic, occupational, or otherwise specialized communities. Topics such as the following may be treated from the perspective of English studies: linguistics, literatures (including literary theory and criticism), sociolinguistics, needs assessment, curriculum development and evaluation, materials preparation, discourse analysis, teaching and testing techniques, the effectiveness of various approaches to language learning and language teaching, teacher training and English for Specific Purposes (ESP). The journal also publishes solicited book reviews.

This journal is not a predatory journal, but an open-access journal and all published articles are freely available to the wider public and there are no publication fees. Nevertheless, Open Access publication will have no effect on the peer review process or acceptance of submitted articles.

We are currently negotiating with a reputable publishing house (not a predatory one), which means that we will have more viewership resulting in more citations, Thomson Reuters support and other journal databases.

Authors are requested to submit their papers electronically to the following Editors’ emails:

natasabakicmiric@yahoo.com

gaipov.davran@sdu.edu.kz

You may also use the abovementioned emails for any inquiries relating to the submission of articles and the journal in general.

INSTRUCTIONS FOR AUTHORS

Length

Articles should be between 5000-8000 words in length, including references, notes and tables. Research Notes and Discussions should be between 3000-4000 words. Reviews should be between 1000 and 1200 words. Articles should be prepared in MS Office 2010 or 2013.

Short Bio Notes

A short (maximum 50 words) biography of each author should be included in the manuscript as a separate file following the blind review procedures outlined above.

Article structure

Essential title page information

- **Title** – It should be concise and informative.
- **Author(s) names and affiliations** - The authors' affiliation addresses (where the actual work was done) should be included below the names. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author.
- **Corresponding author** - Clearly indicate who will handle correspondence at all stages of refereeing and publication, as well as post-publication. Ensure that phone numbers (with country and area code) are provided in addition to the e-mail address and the complete postal address. Contact details must be kept up to date by the corresponding author.
- **Abstract** - A concise and factual abstract (between 100-200 words) is required. The abstract should state briefly the purpose of the research, the principal results and major conclusions. An abstract is often presented separately from the article, so it must be able to stand alone. References should be avoided, but if essential, then cite the author(s) and year(s). Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.
- **Key words** - Maximum 5 to 7 key words.

Subdivision - numbered sections

Divide your article into clearly defined and numbered sections. Subsections should be numbered 1.1 (then 1.1.1, 1.1.2, ...), 1.2, etc. (the abstract is not included in section numbering). Use this numbering also for internal cross-referencing: do not just refer to 'the text'. Any subsection may be given a brief heading. Each heading should appear on its own separate line.

Introduction

State the objectives of the work and provide an adequate background that includes a review of relevant literature, avoiding a summary of the results.

Material and methods

Provide sufficient detail to allow the work to be reproduced. Methods already published should be indicated by a reference: only relevant modifications should be described.

Results

Results should be clear and concise.

Discussion

This should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section may be appropriate depending on the nature of the study. Your discussion should refer back to relevant published literature and highlight your contribution.

Conclusion(s)

The main conclusion(s) of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.

Acknowledgements

Place acknowledgements before the references, in a separate section, and not as a footnote on the title page. Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. List those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

Footnotes

Footnotes should be numbered consecutively throughout the article, using superscript Arabic numbers. Many wordprocessors build footnotes into the text, and this feature may be used. Should this not be the case, indicate the position of footnotes in the text and present the footnotes themselves separately at the end of the article. **Do not** include footnotes in the Reference list.

Tables

Number tables consecutively in accordance with their appearance in the text. Place footnotes to tables below the table body and indicate them with superscript lowercase letters. Be precise and clear in the use of tables and ensure that the data presented in tables do not duplicate results described elsewhere in the article.

References

In-text Citations

Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication. In-text citations should follow the Chicago Manual referencing style (notes and bibliography). Use this link as reference: www.chicagomanualofstyle.org.

References after text should be arranged first alphabetically and then further sorted chronologically if necessary. More than one reference from the same author(s) in the same year must be identified by the letters 'a', 'b', 'c', etc., placed after the year of publication.
